Minutes

1. Current Agenda

Board members were invited to approve the current agenda as well as the previous meeting minutes. The draft minutes were open to be amended by the board members. The current agenda was open to additional items under item - *Any other business*.

2. Joint Learning Platform State of the question and next steps

The Secretariat provided an update regarding the Joint Learning Platform's current status. Board members were encouraged to discuss the alignment of this project with broader OpenEU goals and explore using the portal for development visibility.

Rafael Pastor shared a preliminary mock-up for the shared catalogue, currently being developed at UNED. Members are invited to check the prototype here: https://blogs.uned.es/openeu2/course-grid/.

The Secretariat will set up a document for feedback, which UNED aims to integrate by September for the platform's launch. Key priorities for UNED include:

UNED must establish a feedback protocol for technical issues and refine automated ingestion. Meanwhile, the Secretariat and UOC will work on a redesigned frontend with improved user experience, with UNED leading the implementation.

Once the visual and conceptual redesign is settled, UNED will manage the migration to a dedicated WordPress template, ensuring database and ontological consistency.

Next steps:

- Define operational circuits (roles for content implementation)
- Establish feedback loop mechanisms
- Enhance frontend with superior UX design

3. Participatory Platform

The secretary General gave an update on the status of the Decidim participatory platform. We discussed the need to update WP meeting calendar calls and share other relevant information. Reminded that David Ramirez is available to provide backup service, though not as an editor.

Board members highlighted the great effort and work that is being done by volunteers regarding the OpenEU Fest.

4. Any other business

Board members were invited to expose any other item before ending the meeting.
