

Results of the OpenEU 2nd call for applications for the short-stay mobility program for PhD students

The OpenEU Alliance launched in June 2026 the 2nd open call to invite PhD candidates from the partner Universities to apply for short research stays at another OpenEU institution. These stays, lasting from 1 to 3 months, will foster networking and collaboration across the alliance, bringing together young researchers from all over Europe!

The following students were selected to implement their short research stays at another University in 2026:

Name	Home Institution	Host Institution
Yanying Cheng	Daugavpils University, Latvia	Universidade Aberta, Portugal
Magdalena Ivanova	University of Veliko Tarnovo	Universidade Aberta, Portugal

We wish to the participants a fruitful collaboration!
